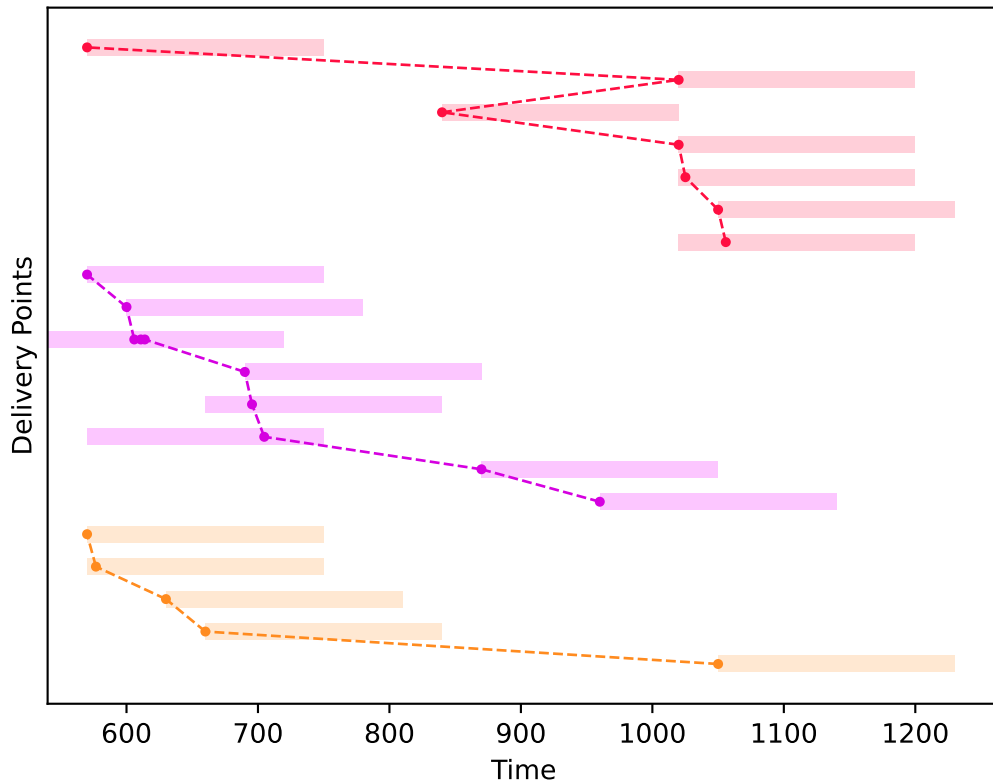

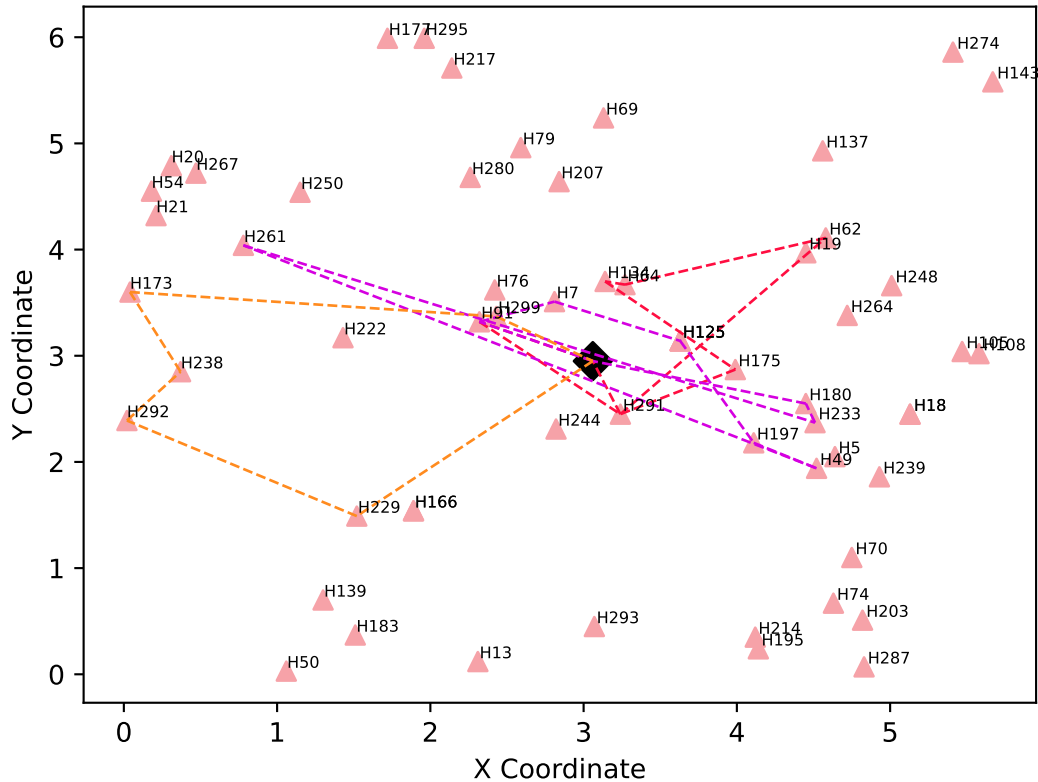

Figure 1: A network diagram showing the relationships between 40 hydrogen atoms (H1 to H40) in a protein structure. The atoms are represented by pink triangles. The connections are color-coded: orange dashed lines for atoms 1-10, purple dashed lines for atoms 11-20, red dashed lines for atoms 21-30, and black dashed lines for atoms 31-40. A central black diamond shape represents the core of the network.
